Operating Procedure (SOP) describes all the individual steps necessary for calibrating a HPLC in accordance with cGMP (current good manufacturing practices). HPLC Calibration - Pharma GMP SOP Standard Operation Procedure Introduction This Agilent SOP describes a procedure for detecting a select set of pharmaceutical and personal care products (PPCPs) in environmental water samples by ultra-high performance liquid chromatography combined with tandem mass spectrometry (UHPLC/MS/MS) using isotope dilution and internal standard quantitation techniques. Agilent Standard Operating Procedure This SOP refers specifically to HPLC. However, the same principles may

be applied to validations of other types of analytical procedures. Well-characterised reference materials with documented purity should be used to perform the validation.
