Actually, this is one of the largest topics as far as number of questions on exams and for number of points in the exams. So make sure you spend some time with this one. Topic 5: Geometry and trigonometry - Studynova Explanation: . The height of the tree requires using trigonometry to solve. The

distance of the student to the tree , partial height of the tree , and the distance between the student's eyes to the top of the tree will form the right triangle. The tangent operation will be best used for this scenario, since we have the known distance of the student to the tree, and the partial height of the tree.
